NONINSTRUCTIONAL OPERATIONS

Goals

In order for students to obtain the maximum benefits from their educational program, a complex set of support services must be provided by the District. These services are essential to the success of the District, and the staff that provides them is an integral part of the educational enterprise. Because resources are always scarce, all assets of District operations, including non-instructional support services, shall be carefully managed in order to obtain maximum efficiency and economy. To that end, the goal of the District is to seek new ways of supporting the instructional program that shall maximize the resources directly available for students' learning programs.

Policy History:

Adopted on: 05/12/98

Revised on:

NONINSTRUCTIONAL OPERATIONS

Transportation

The District may provide transportation to and from school for a student who:

1. resides three or more miles, over the shortest practical route, from the nearest operating public elementary or public high school;
2. is a student with a disability whose IEP identifies transportation as a related service; or
3. has another compelling and legally sufficient reason to receive transportation services.

The District may elect to reimburse the parent or guardian of a student who may be reimbursed for individually transporting any eligible student.

The type of transportation provided by the District may be by a school bus; or by such individual transportation as paying the parent or guardian for individually transporting the pupil; pay board and room reimbursements; providing supervised correspondence study; or providing supervised home study. The Board may authorize children attending an approved private school to ride a school bus provided that space is available, and a fee to cover the per seat cost for such transportation is collected. The District may transport and charge for an ineligible public school student provided that the parent or guardian pays a proportionate share of transportation services. Fees that are collected for the transportation of ineligible students shall be deposited in the transportation fund. Transportation issues that cannot be resolved by the Trustees may be appealed to the county transportation committee.

Homeless students shall be transported in accordance with the McKinney Homeless Assistance Act and state law.

In-Town Busing

In-town busing is defined as the busing of students within three (3) miles of their school. In-town busing is a privilege the District can discontinue at any time. The Superintendent will establish guidelines under which a student may request in-town busing.

Children in Foster Care

The Superintendent will appoint a Point of Contact (POC) to coordinate activities relating to the District's provisions of services to children placed in foster care, including transportation services. The Superintendent, or designee, will inform the Department of Health and Human Services who is the POC for the District. The District will collaborate with the Department of Health and Human Services when transportation is required to maintain children placed in foster care in a school of origin outside their usual attendance area or District when in the best interest of the student. Under the supervision of the Superintendent/designee, the POC will invite appropriate District officials, the Department of Health and

Human Services POC, and officials from other districts to consider how such transportation is to be arranged and funded in a cost-effective manner.

If there are additional costs to be incurred in providing transportation to maintain a student in the school of origin, the District will provide transportation to such school if:

The Department agrees to reimburse the District for the cost of such transportation;

The District agrees to pay for the cost of such transportation; or

The District and the Department agree to share the cost of such transportation.

Definitions

“Foster Care” means 24-hour care for children placed away from their parents, guardians, or person exercising custodial control or supervision and for whom the Department has placement care and responsibility.

“School of origin” means the school in which a child is enrolled at the time of placement in foster care.

While “Best Interest” is not defined in ESSA, that determination shall take into account all relevant factors, including consideration of the appropriateness of the current educational setting, and the proximity to the school in which the child is enrolled at the time of foster care placement.

Contracting for Transportation Services

If the Board enters into a contract for transportation services, the contractor shall operate such equipment according to District policy and the rules and regulations of the Board of Public Education. The contract shall be in effect for not more than five years. Prior to entering into the first such contract, the District shall determine that the cost of contracting for the ensuing term will not exceed the projected costs of operating its own system. Before any transportation contract to a private party or contractor is awarded, the Trustees shall:

1. Secure bids by advertising for a 21-day period (three consecutive weeks); or
2. Negotiate a new contract with the present contractor, provided the new contract does not exceed by more than 12 percent per year of basic costs of the previous contract.

No money shall be expended unless a contract with a private carrier has been executed. The Board Chair shall sign such contracts on behalf of the District.

The District reserves the right to own, operate and to choose with respect to any other form of transportation, whether it be regular school, co-curricular, extra-curricular or District business programs, that means of transportation that best fits the needs of the District at that particular time as judged by the Board.

School Bus Replacement

The Board of Trustees understands the importance of safety when transporting students. The Board also understands that having safe, well maintained, efficient buses in the fleet is important for the safety of the students and driver.

There comes a time when the replacement of a bus is necessary for the safety of all involved. Therefore, the Board of Trustees will use the Bus Depreciation Schedule, as a guide, when determining the time for bus replacements.

Bus Routes and Schedules

The Superintendent or his/her designee shall be responsible for scheduling bus transportation, including determination of routes and bus stops. Such routes are subject to the approval of the county transportation committee. The purpose of bus scheduling and routing is to achieve maximum service with a minimum fleet of buses insofar as this is consistent with rendering safe and reasonable equal service to all bus students.

In order to operate the transportation system as safely and efficiently as possible, the following factors shall be considered in establishing bus routes:

1. A school bus route shall be established with due consideration of the sum total of local conditions affecting the safety, economic soundness and convenience of its operation, including road conditions, condition of bridges and culverts, hazardous crossings, presence of railroad tracks and arterial highways, extreme weather conditions and variations, length of route, number of families and children to be serviced, availability of turn-around points, capacity of bus, and other related factors.
2. The District may extend a bus route across another transportation service area, if it is necessary in order to provide transportation to students in the District's own transportation service area. A district may not transport students from outside its transportation service area.
3. No school child attending an elementary school shall be required to ride the school bus under average road conditions more than one hour without consent of the child's parent or guardian.
4. School bus drivers are encouraged to make recommendations in regard to establishing or changing routes.
5. Parents should be referred to the Superintendent for any request of change in routes, stops, or schedules.

The Trustees reserve the right to change, alter, add or delete any route at such time that such changes are deemed in the best interest of the District subject to approval by the county transportation committee.

Bus Stops

Buses should stop only at designated places approved by school authorities. Exceptions should be made only in cases of emergency, and inclement weather conditions.

Bus stops shall be chosen with safety in mind. Points shall be selected where motorists approaching from either direction will have a clear view of the bus for a distance of at least three hundred (300) to five hundred (500) feet.

School loading and unloading zones are to be established and marked to provide safe and orderly loading and unloading students. The principal of each building is responsible for the conduct of students waiting in loading zones.

Delay in Schedule

The driver is to notify the administration of a delay in schedule. The administration will notify parents on routes and radio station, if necessary.

Responsibilities – Pupils

Pupils must realize that safety is based on group conduct. Talk should be in conversational tones at all times. There should be no shouting or loud talking which may distract the bus driver. There should be no shouting at passersby. Pupils should instantly obey any command or suggestions from the driver and/or his/her assistants.

Responsibilities – Parents

The interest and assistance of each parent is a valued asset to the transportation program. Parents' efforts towards making each bus trip a safe and pleasant experience are requested and appreciated. The following suggestions are only three of the many ways parents can assist:

1. Ensure that students are at the bus stop in sufficient time to efficiently meet the bus.
2. Properly prepare children for weather conditions.
3. Encourage school bus safety at home. Caution children regarding safe behavior and conduct while riding on the school bus.

Safety

The Superintendent shall develop written rules establishing the procedures for bus safety and emergency exit drills, and for student conduct while riding on buses.

If the bus and driver are present, the driver is responsible for the safety of his/her passengers, particularly for those who must cross a roadway prior to loading or after leaving the bus. Except in emergencies, no bus driver shall order or allow a student to board or disembark at other than his/her assigned stop unless so authorized by the Superintendent. In order to assure the safety of all, the bus driver may hold students accountable for their conduct during the course of transportation and may recommend corrective action against a student. Bus drivers are expressly prohibited from using corporal punishment.

The bus driver is responsible for the use of the warning and stop signaling systems and the consequent protection of his/her passengers. Failure to use the system constitutes negligence on the part of the driver.

The system must be used with judgment and courtesy. Its abuse causes resentment on the part of the public. A driver should allow approaching vehicles time to stop or pass before the flashing lights are used.

Eligibility

To be eligible to ride the bus, the individual pupil must:

1. be a student registered in the elementary, middle or high school.
2. reside with his/her parents or guardian who maintain a permanent home within the boundaries of the District and pay transportation.
3. live outside the established transportation zone or boundary.

Out-of-District: Students who reside outside the boundaries of the District and pay tuition may ride the bus free. Their transportation fee is included in the tuition fee. However, bus routes will not be extended outside of the District to accommodate these students.

Within the boundary limit (provided room is available): Students residing within the boundary limit may ride on the bus on a fee basis as established by the Trustees.

Inclement Weather

The Board recognizes the unpredictability and resulting dangers associated with the weather in Montana. To achieve the maximum safety for children and efficiency of operation, the Superintendent is empowered to make decisions as to the emergency operation of buses, the cancellation of bus routes and the closing of school in accordance with his/her best judgment. The Board may develop guidelines in cooperation with the Superintendent to assist him/her in making such decisions.

NOTE: To receive full state/county reimbursement, budgets must have enough funds to cover the costs of any changes to the route.

NOTE: The County transportation committee has authority to establish transportation service areas should circumstances and/or geography (demographics) warrant.

Transportation of Students with Disabilities

Transportation shall be provided as a related service when a student with a disability requires special transportation in order to benefit from special education or to have access to an appropriate education placement. Transportation is defined as:

- (a) travel to and from school and between schools;
- (b) travel in and around school buildings or to those activities which are a regular part of the student's instructional program;
- (c) specialized equipment (such as special or adapted buses, lifts, and ramps) if required to provide special transportation for a student with disabilities.

The Evaluation Team who develops the disabled student's Individualized Education Program will determine on an individual basis when a student with a disability requires this related service. Such recommendations must be specified on the student's IEP. Only those children with disabilities who qualify for transportation as a related service under the provisions of the IDEA shall be entitled to special transportation. All other children with disabilities in the District have access to the District's regular transportation system under policies and procedures applicable to all students of the District. Utilizing the District's regular transportation service shall be viewed as a "least restrictive environment."

Mode of Transportation

One of the District's buses will be the preferred mode of transportation. Exceptions may be made in situations where buses are prohibited from entering certain subdivisions due to inadequate turning space or distance from school may seriously impact bus scheduling. In such situations, other arrangements such as an individual transportation contract may be arranged with the parents. Such voluntary agreement shall stipulate in writing the terms of reimbursement.

District-Owned Vehicles

The District owns and maintains certain vehicles. Included among them are pickups, school buses and vans. These are for use by properly authorized personnel of the District for District business purposes. The following regulations shall apply to the use of these vehicles:

Any driver who receives a citation for a driving violation shall personally pay all fines levied. All citations received while operating a District vehicle shall be reported to the driver's supervisor. Failure to report any violation or the violation itself may result in disciplinary action.

Bus and Vehicle Maintenance, District

Buses used in the District's transportation program shall be in safe and legal operating condition. All buses shall be inspected by the Department of Justice, Montana Highway Patrol before the beginning of each semester. The Superintendent shall establish a specific list of tasks that bus drivers shall perform on a daily basis. All other District vehicles shall be maintained following established programs as developed by the Superintendent.

Bus Maintenance – Non-Owned Vehicles

The Superintendent's designee with bus experience, will make periodic inspections of the buses and drivers. Copies of inspection reports are to be made available to the administration and the contractor. Follow-up checks are to be made to see that necessary corrections are made. The Highway Patrol also inspects these buses if they are used for home-to-school and back transportation. For the District to receive state/county reimbursement, the bus must be inspected by the Highway Patrol.

It is recommended that these inspections coincide with the state inspections conducted by the Highway Patrol. However, other inspections may be conducted as deemed necessary by the Superintendent.

PERSONNEL

Driver Training and Responsibility

Bus drivers shall observe all state statutes and administrative rules governing traffic safety and school bus operation. At the beginning of each school year, the District will provide each driver with a copy of the District's written rules for bus drivers and for student conduct on buses.

School bus drivers must hold a valid Montana school bus certificate in order for a district to receive state reimbursement for that driver's bus routes. Qualifications for bus drivers are prescribed by 20-10.103, MCA, and by the board of Public Education in Arm 10.64.201. The first aid certificate required by ARM 10.64.201 must include certification in CPR, be signed by a certified instructor, and be received after an initial in-person training of at least four hours with annual renewals.

A school bus driver is prohibited from operating a school bus while using a cellular phone, including hands free cellular phone devices, except:

- (1) During an emergency situation;
- (2) To call for assistance if there is a mechanical breakdown or other mechanical problem;
- (3) When the school bus is parked.

A driver may not operate a school bus without a valid, current certificate.

A teacher, coach, or other certified staff member assigned to accompany students on a bus will have primary responsibility for behavior of students in his or her charge. The bus driver has final authority and responsibility for the bus. The Superintendent will establish written procedures for bus drivers.

Maximum Driving Time

The district recognizes from a risk management and student safety standard the importance of driver safety while transporting students. Therefore, the district will meet the federal standard on maximum driving time for drivers. No driver will be required to drive more than 10 hours following 8 consecutive hours off duty.

Student Conduct on Buses

The general student code of conduct is applicable to conduct on school buses.

The Superintendent will establish written rules of conduct for students riding school buses. Such rules shall be reviewed annually by the Superintendent and revised if necessary. If the rules are substantially revised, they shall be submitted to the Board for approval.

A copy of the rules of conduct for students riding buses shall be provided to students at the beginning of the year. The classroom teacher and bus driver shall review the rules with the students at the beginning of each school year. A copy of the rules shall be posted in each bus and shall be available upon request at the District office and in each building principal's office.

The bus driver shall be responsible for enforcing the rules, and shall work closely with the parent and building principal to modify a student's behavior. The rules shall include consistent consequences for student misbehavior.

Recommendations for permanent termination of bus privileges will be referred to the Superintendent for final determination. The termination may be appealed to the Board. No further appeal shall be allowed.

A recommendation to terminate bus privileges shall be accompanied by a written record of the incident(s) that lead to the recommendation.

Air Quality Restrictions on Outdoor Activities, Practice and Competition

Each school district is responsible for ensuring the safety of its students and student athletes when participating in physical education, recess, practices or athletic contests.

The District Board of Trustees and Administration shall use the Recommendations for Outdoor Activities Based on Air Quality for Schools guidelines, developed by DEQ and the DEQ's Air Data Map, as the determining factor when making a decision to allow or not allow students to participate in outdoor activities and contests.

The District Board of Trustees and Administration have developed the following protocol for determination of allowing students and student athletes to participate in outdoor activities when Air Quality Restrictions have reached the Unhealthy for Sensitive Groups or higher categories as indicated on the DEQ guidelines.

1. The Plentywood School District shall use the geographical spot on the todaysair.mt.gov website to determine the air quality for our school district.
2. The following personnel shall make the decision to hold or cancel outdoor activities, practices, or contests:
 - a. Recess (all levels) Superintendent
 - b. Junior High practices (all levels) Superintendent
 - c. Junior High contests (all levels) Superintendent
 - d. High School practices (all levels) Superintendent
 - e. High School contests (all levels) Superintendent
 - f. All outdoor activities, (all levels) Superintendent
3. The decision to hold or cancel outdoor activities shall be made 1 hour in advance of the activity.
4. The notice to hold or cancel an outdoor activity shall be communicated to:
 - a. Students through PA system and School Bulletin
 - b. Staff through PA system and School Bulletin
 - c. Coaches through phone
 - d. Parents through school Facebook page and local radio station
 - e. Community through school Facebook page and local radio station

The superintendent or an employee designated by the superintendent is authorized to establish a procedure to limit the infiltration of outside air into each school during poor air quality conditions.

Activity Trips

The use of school buses is strictly limited to school activities. Buses may not be loaned or leased to non-school groups unless permission is specifically granted by the Board. On all activity runs, buses will be operated by a qualified bus driver only. On all activity trips, only authorized activity participants, professional staff and chaperones assigned by the high school administration may ride the bus. A duplicate copy of the passenger list will be made for all activity trips. One copy will remain with the professional staff member in charge on the bus and one copy will be given to the Activities Director before the bus departs.

Food Service

The District supports the philosophy of the National School Lunch Program and shall provide wholesome, appetizing and nutritious meals for children in District schools. The Board may authorize a portion of the federal funds received in lieu of taxes to be used to provide free meals for federally connected indigent pupils.

Because of the potential liability of the District, the food services program shall not accept donations of food without the express approval of the Board. Should the Board approve a food donation, the superintendent shall establish inspection and handling procedures for the food and determine that the provisions of all state and local laws have been met before selling the food as part of the school meals.

As an integral part of a school, the District's food service is operated in compliance with ARM Title 37, chapter 110, subchapter 2, rules for food service establishments.

Commodities

The District shall use food commodities made available under the Federal Food Commodity Program for school meals.

Free and Reduced Price Food Services

The District shall provide free and reduced-price meals to students, according to the terms of the National School Lunch Program and the laws, rules and regulations of the state. The District shall inform parents of the eligibility standards for free or reduced-price meals. Identity of student receiving free or reduced-price meals shall be confidential, in accordance with the National School Lunch Program guidelines. A parent has the right to appeal to a designated hearing official any decision with respect to his or her application for free or reduced-price food services.

The Board may establish programs whereby meals may be provided in the District in accordance with National School Lunch Program guidelines.

The amount charged for such meals shall be sufficient to cover all costs of the meals including preparation labor and food, handling, utility and equipment depreciation costs.

Meal Charge Policy

Note: For the purpose of this policy, parent includes guardian, caretaker relative, and any adult responsible for the care of the child.

The goal of the Plentywood School District is to provide students with healthy meals each day. However, unpaid charges place a large financial burden on our Food Services Department. The purpose of this policy is to insure compliance with federal reporting requirements for the USDA Child Nutrition Program, and to provide oversight and accountability for the collection of outstanding student meal balances.

The intent of this policy is to establish uniform meal account procedures throughout the Plentywood School District. The provisions of this policy pertain to regular priced school breakfast and lunch meals only. While the USDA Child Nutrition Program does not require that a student who pays for regular priced meals be served a meal without payment, the Plentywood Public Schools provides this policy as a courtesy to those students in the event that they forget or lose their lunch money, or have an unpaid balance in their lunch account.

K-12

Students at Plentywood Schools may pay cash for their meals at any time. Cash or checks may be paid at the office. Meals may be pre-paid by the week, month, semester or the school year.

When a student has a negative balance in their account, the student will be allowed to charge up to the limit of \$10.00. Further meals will still be charged to a child's lunch account. Middle and High School students may be kept from charging once the charge limit has been reached or they may be given an alternate meal. This meal charge will be added to the student's account, but this meal will be given until the student makes a payment on the account, which will bring the account below the charge limit. Lunch account monitoring is the responsibility of the parent and the child. The office staff is there for help in any way—children may ask for a balance at any time. Account balance notices will be given to students who are over the \$10.00 charge limit. Account balance notices for students who have reached their limit will be mailed home.

Students are responsible for their own cash lunch money—the school will not replace stolen or lost cash. Parents that send a check for the account and the check is lost or does not appear on the account, may bring in a photo copy of the check from the bank to the office if it has been cashed. Mistakes happen and if the check was cashed by our food service, corrections to the account will be made as soon as possible. If a photo copy is not available, the deposit will not be replaced. [Please send deposit money via check, if possible, (cash is accepted, also), in an envelope with the child's full name.

Free Meal Benefit – Free status students will be allowed to receive a free breakfast and lunch each day. Seconds must be prepaid and are subject to the \$10.00 charging limit. A student will be allowed to charge a maximum of \$10.00 to their account after the balance reaches zero. Once a student has charged the \$10.00, he/she will not be allowed to charge for seconds.

Reduced Meal Benefit - Reduced status students will be allowed to receive a breakfast for \$.30 and lunch for \$.40 each day. A student will be allowed to charge a maximum of \$10.00 to their account after the balance reaches zero. Once a student has charged the \$10.00, he/she will not be allowed to charge for seconds.

Parents are responsible for meal payment to the food service program. Notices of low or deficit balances will be sent to parents at regular intervals during the school year.

Refunds for withdrawn, and graduating students; a written request for a refund of any money remaining in their account must be submitted. An e-mail request is also acceptable. Students who are graduating at the end of the year will be given the option to transfer to a sibling's account with a written request.

Unclaimed Funds must be requested within one school year. Unclaimed funds will then become the property of the Plentywood School District Food Service Program.

Balances Owed will be sent to collections per Federal guidelines.

Adult Meals: Adults are not allowed to charge meals per USDA policy regarding school food service use of Federal NSLP funds.

If a student is without meal money on a consistent basis, the administration will investigate the situation more closely and take further action as needed. If financial hardship exists, parents and families are encouraged to apply for free or reduced price lunches for their child.

Procurement Policy for School Food Purchases

The Plentywood School District will adhere to the following requirements for any procurement related to food service:

Purchases:

- Purchases greater than \$80,000:
 - If the aggregate amount exceeds eighty thousand dollars (\$80,000), the contract must be awarded through a formal bid process and a call for bids or request for proposals shall be published according to 20-9-204, MCA. No contract shall be divided for the purpose of avoiding the formal procurement process.
 - The District may enter into a cooperative purchasing contract for procurement of supplies with one or more districts or a Cooperative Services Program. This allows the District to participate in a cooperative purchasing group to purchase supplies through the group without bidding if the cooperative purchasing group has a publicly available master list of items available with pricing included and provides an opportunity at least twice yearly for any vendor, including a Montana vendor, to compete, based on a lowest responsible bidder standard.

Bid Specifications: (OPTIONAL)

The Plentywood School District contracts will not be awarded to any potential vendors who write any of the bid specifications, the solicitation documents, or any of the contract language. The district must take care that any bids for services and supplies are written in the broadest possible terms to allow for participation by the largest number of potential vendors.

Identical bid specifications and/or request for proposals will be provided to all potential vendors.

Geographic Preference:

No Geographic Preference (advantage based on location) is allowed with federal funds except for documented Farm to School (Farm to Plate) efforts. Therefore, as part of Farm to School Plentywood School District may choose to apply a geographic preference when procuring unprocessed locally grown or locally raised agricultural products only.

Buy American:

The District will adhere to “Buy American” for the food service program. Therefore Food Service is required to purchase, to the maximum extent possible, domestic products for use in meals served in our Child Nutrition Program. However, exceptions are allowed when:

- Food preferences can only be met with foreign goods
- Insufficient quantity and/or quality is available in the USA
- Domestic cost is **significantly** higher

Standards of Conduct for District Employees:

- The Plentywood School District maintains the following code of conduct for any employees engaged in award and administration of contracts supported by Federal Funds:
- No District employee will engage in any procurement when there is a conflict of interest, real or perceived, and District employees cannot solicit or accept any gratuities, favors or anything of monetary value from prospective vendors. This shall not preclude district personnel from serving on boards or participating in organizations that support the district's need to obtain quality services and supplies.
- No District employee shall participate in the selection, award or administration of a contract when any of the following persons have a financial interest in the firm selected for award:
 - The employee
 - Any member of his/her immediate family
 - People with whom there is an intimate personal relationship
 - An organization which employs or is about to employ any of the above
- The District would like all employees to behave with the utmost integrity and never be self-serving, be fair in all aspects of the procurement process, be alert to conflicts of interest, and avoid any compromising situations.
- Employees found to be in violation of this policy are subject to disciplinary action, up to and including termination.

Tobacco Free Policy

The District maintains tobacco-free buildings and grounds. Tobacco includes but is not limited to cigarettes, cigars, snuff, pipe smoking tobacco, smokeless tobacco, vapor product, alternative nicotine product or any other tobacco or nicotine delivery innovation.

Use of tobacco or nicotine products in a public school building or on public school property is prohibited, unless used in a classroom or on other school property as part of a lecture, demonstration, or educational forum sanctioned by a school administrator or faculty member, concerning the risks associated with using tobacco products or in connection with Native American cultural activities.

For the purpose of this policy, “public school building or public school property” means:

- Public land, fixtures, buildings, or other property owned or occupied by an institution for the teaching of minor children, that is established and maintained under the laws of the state of Montana at public expense; and
- Includes playgrounds, school steps, parking lots, administration buildings, athletic facilities, gymnasiums, locker rooms, and school vehicles.

Violation of the policy by students and staff will be subject to actions outlined in District discipline policies.

Use of FDA-approved cessation devices may be permitted at school buildings and on school grounds with the approval of the building administrator.

Risk Management

The Board believes the District must identify and measure risks of loss due to the damage or destruction of District property or to claims against the District by others claiming to have been harmed by the action or inaction of the District, its offices or staff. A risk management program shall be implemented to reduce or eliminate risks where possible, and to determine which risks the District can afford to assume. Such a program shall consider the benefits, if any, of joining with other units of local government for joint purchasing of insurance, joint self-insuring or joint employment of a risk manager. The Trustees shall assign the primary responsibility for the administration and supervision of the risk management program to a single person. The Board shall review the status of the risk management program each year.

The District shall purchase and pay for surety bonds for the Superintendent, Clerk and such other staff and in such amounts as the Board shall from time to time determine to be necessary for honest performance of the staff in the conduct of the District’s financial operations.

District Safety

For purposes of this policy, “disaster means the occurrence or imminent threat of damage, injury, or loss of life or property”.

The Board recognizes that safety and health standards should be incorporated into all aspects of the operation of the District. Rules for safety and prevention of accidents will be posted in compliance with the Montana Safety Culture Act and the Montana Safety Act. Injuries and accidents will be reported to the District office.

The board of trustees has identified the following local hazards that exist within the boundaries of its school district:

[Fire, Earthquake, Avalanche, High Winds, Tornadoes, Intruders, Firearms, etc.]

The Superintendent shall design and incorporate drills in its school safety or emergency operations plan to address the above stated hazards. The trustees shall certify to the office of public instruction that a school safety or emergency operations plan has been adopted. This plan and procedures will be discussed and distributed to each teacher at the beginning of each school year. There will be at least eight (8) disaster drills a year in a school. All teachers will discuss safety drill procedures with their class at the beginning of each year and will have them posted in a conspicuous place next to the exit door. Drills must be held at different hours of the day or evening to avoid distinction between drills and actual disasters. A record will be kept of all fire drills.

The trustees shall review the school safety or emergency operations plan periodically and update the plan as determined necessary by the trustees based on changing circumstances pertaining to school safety. Once the trustees have made the certification to the office of public instruction, the trustees may transfer funds pursuant to Section 2, 20-1-401, MCA to make improvements to school safety and security.

The Superintendent will develop safety and health standards which comply with the Montana Safety Culture Act. The Superintendent shall ensure District employees are provided equipment, tools, and devices designed to ensure a safe and health workplace in accordance with this policy. Failure to use the provided equipment in a suitable or timely manner may be considered a violation of District policy. If a staff member requires equipment that is not available, an employee may submit a request to the administration in accordance with established District practice.

Sale of Real Property

Unless the property can be disposed of without a vote, the Board has the authority to dispose of all District Property. This power shall be exercised only when the qualified electors of the District approve of such action at an election called for such approval or when the Trustees adopt a resolution stating their intention to dispose of the property. When the Trustees adopt such a resolution, they shall schedule a meeting to consider a resolution to authorize the sale of the real property. The conduct of the meeting and any such subsequent appeals shall be in accord with 20-6-604, MCA.

Receipts from the sale of real property shall be placed into the debt service fund, building fund, general fund or any combination of these three funds at the discretion of the trustees.

Lead Renovation

In accordance with the requirements of the Environmental Protection Agency (EPA), the Plentywood School District has this Lead Renovation Policy that is designed to recognize, control and mitigate lead hazards at all District owned facilities and grounds.

The Lead-based paint renovation, repair and painting program (RRP) is a federal regulatory program affecting contractors, property managers, and others who disturb painted surfaces. It applies to child-occupied facilities such as schools and day-care centers built prior to 1978.

“*Renovation*” is broadly defined as any activity that disturbs painted surfaces and includes most repair, remodeling, and maintenance activities, including window replacement.

The District has implemented this policy to identify, inspect, control, maintain and improve the handling of lead related issues across the district facilities and grounds. In an effort to reduce potential hazards, the District through training has put together maintenance programs that will not only better protect the environment, but the students and employees of the District as well.

The District’s Lead Renovation Policy shall apply too not only employees of the maintenance department but to outside contractors as well. No outside painting contractor will be permitted to work for the District after April 22, 2010 unless they can show proof of training relative to lead renovation or maintenance from an accredited training institution.

Information Distribution Requirements

No more than 60 days before beginning renovation activities in any school facility of the District, the company performing the renovation must:

1. Provide the Superintendent with EPA pamphlet titled *Renovate Right: Important Lead Hazard Information for Families, Child Care Providers and Schools*.
2. Obtain, from the District, a written acknowledgement that the District has received the pamphlet.
3. Provide the parents and guardians of children using the facility with the pamphlet and information describing the general nature and locations of the renovation and the anticipated completion date by complying with one of the following:
 - (i) Mail or hand-deliver the pamphlet and the renovation information to each parent or guardian of a child using the child-occupied facility.
 - (ii) While the renovation is ongoing, post informational signs describing the general nature and locations of the renovation and the anticipated completion date. These signs must be posted in areas where they can be seen by the parents or guardians of the children frequenting the child-occupied facility. The signs must be accompanied by a posted copy of the pamphlet or information on how interested parents or guardians can review a copy of the pamphlet or obtain a copy from the renovation firm at no cost to the parents or guardians.
4. The renovation company must prepare, sign, and date a statement describing the steps

Service Animals

For the purposes of this policy, state law defines a service animal as a dog or any other animal that is individually trained to do work or perform tasks for the benefit of an individual with a disability. Federal law definition of a disability includes a physical, sensory, psychiatric, intellectual, or other mental disability.

The District shall permit the use of a miniature horse by an individual with a disability, according to the assessments factors as outlined in Policy 8425P, if the miniature horse has been individually trained to do work or perform tasks for the benefit of the individual with a disability.

The School District will permit the use of service animals by an individual with a disability according to state and federal regulations. The School District will honor requests for service animals in accordance with the applicable Section 504 or Special Education policy adopted by the Board of Trustees. The work or tasks performed by a service animal must be directly related to the handler's disability.

Examples of work or tasks performed by the service animal to accommodate an identified disability include, but are not limited to, assisting individuals who are blind or have low vision with navigation and other tasks, alerting individuals who are deaf or hard of hearing to the presence of people or sounds, providing nonviolent protection or rescue work, pulling a wheelchair, assisting an individual during a seizure, alerting individuals to the presence of allergens, retrieving items such as medicine or the telephone, providing physical support and assistance with balance and stability to individuals with mobility disabilities, and helping persons with psychiatric and neurological disabilities by preventing or interrupting impulsive or destructive behaviors.

The crime deterrent effects of an animal's presence and the provision of emotional support, well-being, comfort, or companionship do not constitute work or tasks for the purposes of this definition.

The District may ask an individual with a disability to remove a service animal from the premises if:

- The animal is out of control and the animal's handler does not take effective action to control it; or
- The animal is not housebroken

The District is not responsible for the care or supervision of the service animal.

Individuals with disabilities shall be permitted to be accompanied by their service animals in all areas of the District's facilities where members of the public, participants in services, programs or activities, or invitees, as relevant, are allowed to go.

Service Animal Allowance Procedure

The School District will honor requests for service animals by students or staff in accordance with the applicable Section 504 or Special Education policy adopted by the Board of Trustees. The following procedures have been developed which will help guide the administration when a request for the use of a service animal has been presented by an individual with a disability.

Inquiries: The administration shall not ask about the nature or extent of a person's disability, but may make two inquiries to determine whether an animal qualifies as a service animal. The administration may ask if the animal is required because of a disability and what work or task the animal has been trained to perform. The administration shall not require documentation, such as proof that the animal has been certified, trained, or licensed as a service animal. Generally, the administration may not make these inquiries about a service animal when it is readily apparent that an animal is trained to do work or perform tasks for an individual with a disability (e.g., the dog is observed guiding an individual who is blind or has low vision, pulling a person's wheelchair, or providing assistance with stability or balance to an individual with an observable mobility disability).

Exclusions: The administration may ask the individual to remove the service animal from the premises if the animal is out of control and the handler does not take effective action to control it, or if the animal is not housebroken. If the administration properly excludes the service animal, it shall give the individual the opportunity to participate in the service, program, or activity without having the service animal on the premises.

Surcharges: The administration shall not ask or require the individual to pay a surcharge, even if people who are accompanied by pets are required to pay fees, or to comply with other requirements generally not applicable to people without pets. If the District normally charges individuals for the damage they cause, the individual may be charged for damage caused by his or her service animal.

Miniature horses assessment factors: In determining whether reasonable modifications can be made to allow a miniature horse into a specific facility, the District shall consider:

- The type, size, and weight of the miniature horse
- Whether the miniature horse is housebroken, and
- Whether the miniature horse's presence in a specific facility compromises legitimate safety requirements that are necessary for safe operation.

Therapy Animals

The District supports the use of therapy dogs and other therapy animals by teachers or other qualified school personnel (“Owner”) for the benefit of its students, subject to the conditions of this policy.

Therapy dogs and other therapy animals are family pets that are trained and registered or certified through therapy organizations. They are only half of the therapy team. The handler is the other half. Therapy teams enter the school by invitation or prior approval.

A therapy animal is not a service animal, and unlike a service animal, a therapy animal does not assist a person with a disability with activities of daily living, nor does it accompany a person with a disability at all times. Therapy animals do not have legal rights.

Requirements of Therapy Animals and User/Owners

Individuals with disabilities using therapy or companion animals are responsible for their animals at all times and must comply with the following requirements:

Request: An Owner must submit a written request to the Superintendent. The request must be renewed each school year or whenever a different therapy animal will be used.

Registration, Training and Certification: The Owner must register the therapy animal and provide documentation of the registration, certification, and training to the Superintendent. The registration and certification must remain current at all times.

Health and Vaccination: The therapy animal must be clean, well groomed, in good health, house broken, and immunized against diseases common to dogs. The Owner must submit proof of current licensure from the local licensing authority and proof of the therapy animal’s current vaccinations and immunizations from a licensed veterinarian.

Control: A therapy animal must be under the control of the “Owner”, at all times, through the use of a leash or other tether unless the use of a leash or other tether would interfere with the therapy animals’ safe, effective performance of its work or tasks.

Identification: The therapy animals must wear appropriate visible identification that identifies in writing that the animal is a therapy animal.

Behavior: The Owner must take responsibility for the behavior of the animal in private and public places, and for due care and diligence in the use of the animal on school district property.

Health and Safety: The therapy animal must not pose a health and safety risk to any student, employee, or other person at the school.

Supervision and Care of Therapy Animals: The Owner is solely responsible for the supervision and care of the therapy dog, including any feeding, exercising, and clean-up while the animal is in the school building or on school property. The school district is not responsible for providing any care, supervision, or assistance for a therapy animal.

Authorized Areas: The Owner shall only allow the therapy animal to be in areas in school buildings or on school property that are authorized by the school administrators.

Insurance: The Owner must submit a copy of an insurance policy that provides liability coverage for the therapy animal while on school property.

Exclusion or Removal from School. A therapy animal may be excluded from school property and buildings if a school administrator determines that:

- (1) A handler does not have control of the therapy animal;
- (2) The therapy animal is not house broken;
- (3) The therapy animal presents a direct and immediate threat to others in the school; or
- (4) The animal's presence otherwise interferes with the educational process.

The Owner shall be required to remove the therapy animal from school premises immediately upon such a determination.

Allergic Reactions. If any student or school employee assigned to a classroom in which a therapy animal is permitted, and suffers an allergic reaction to the therapy animal, the Owner of the animal will be required to remove the animal to a different location designated by an administrator.

Damages to School Property and Injuries: The Owner of a therapy animal is solely responsible and liable for any damage to school property or injury to personnel, students, or others caused by the therapy animal.

Therapy Animals in Training; This policy shall also be applicable to therapy animals in training that are accompanied by a bona fide trainer.

Records Management

The District will retain, in a manner consistent with applicable law and the state's *Rules for Disposition of Local Government Records*, such records as are required by law or regulations to be created and/or maintained, and such other records as are related to students, school personnel, and the operations of the schools.

For the purpose of this policy, "records" are all documentary materials, regardless of media or characteristics, made or received and maintained by the school unit in transaction of its business. Records include email and other digital communications sent and received.

Records may be created, received, and stored in multiple formats, including but not limited to print, microfiche, audio and videotapes, and various digital forms (on hard drives, computer disks and CDs, servers, flash drives, etc.).

The Superintendent will be responsible for developing and implementing a records management program for the cataloging, maintenance, storage, retrieval, and disposition of school records. The Superintendent will also be responsible for developing guidelines to assist school employees in understanding the kinds of information that must be saved and those which can be disposed of or deleted. The Superintendent may delegate records-management responsibilities to other school personnel at his/her discretion to facilitate implementation of this policy.

Litigation Holds for Electronic Stored Information (ESI)

The school district will have an ESI Team. The ESI Team is a designated group of individuals who implement and monitor litigation holds, a directive not to destroy ESI that might be relevant to a pending or imminent legal proceeding. The ESI Team will include a designated school administrator, an attorney, and a member from the Technology Department. In the case of a litigation hold, the ESI Team shall direct employees and the Technology Department, as necessary, to suspend the normal retention procedure for all related records.

Inspections of ESI

Any requests for ESI records should be made in writing and will be reviewed by the Superintendent or designee, in consultation with an attorney if needed, and released in accordance with Montana public records law.

Delegated Authority

The Board delegates to the Superintendent or designees the right to implement and enforce additional procedures or directives relating to ESI retention consistent with this policy, as needed.

Automatic External Defibrillators (AED)

The Board of Trustees of Plentywood K-12 Schools recognizes that from time to time emergencies may arise that justify the use of an Automated External Defibrillator (AED). The Board has purchased one or more of these units for use by qualified personnel. The Board of Trustees approves the use of AED units, subject to the following conditions:

1. Establish a program for the use of an AED that includes a written plan that must specify:
 - Where the AED will be placed;
 - The individuals who are authorized to operate the AED;
 - How AED use will be coordinated with an emergency medical service providing services in the area where the AED is located;
 - The medical supervision that will be provided;
 - The maintenance that will be performed on the AED;
 - Records that will be kept by the program;
 - Reports that will be made of AED use;
 - The name, location, and telephone number of a physician, or other individual designated by the physician, designated to provide medical supervision of the AED program; and
 - Other matters as specified by the Department of Public Health and Human Services;
2. Adhere to the written plan required by subsection (1);
3. Ensure that before using the AED, an individual authorized to operate the AED receives appropriate training approved by the DPHHS in cardiopulmonary resuscitation and the proper use of an AED;
4. Maintain, test, and operate the AED according to the manufacturer's guidelines and maintain written records of all maintenance and testing performed on the AED;
5. Ensure that the physician or other individual designated by the physician to supervise the AED program supervises the AED program to ensure compliance with the written plan, this part, and rules adopted by the District and reviews each case in which the AED is used;
6. Each time an AED is used for an individual in cardiac arrest, require that an emergency medical service is summoned to provide assistance as soon as possible and that the AED use is reported to the supervising physician or the person designated by the physician and to the District as required by the written plan;
7. Before allowing any use of an AED, provide the following to all licensed emergency services and any public safety answering point or emergency dispatch center providing services to the area where the AED is located:
 - a. A copy of the plan prepared pursuant to this section; and
 - b. Written notice, in a format prescribed by the DPHHS rules, stating:

- i. That an AED program has been established by the District;
- ii. Where the AED is located; and
- iii. How the use of the AED is to be coordinated with the local emergency medical service system.

Liability Limitations

An individual who provides emergency care or treatment by using an AED in compliance with this policy and an individual providing cardiopulmonary resuscitation to an individual upon whom an AED is or may be used are immune from civil liability for a personal injury that result from that care or treatment.

An individual who provides emergency care or treatment by using an AED in compliance with this policy and an individual providing cardiopulmonary resuscitation to an individual upon whom an AED is or may be used are immune from civil liability as a result of any act or failure to act in providing or arranging further medical treatment for the individual upon whom the AED was used, unless the individual using the AED or the person providing CPR, as applicable, acts with gross negligence or with willful or wanton disregard for the care of the person upon whom the AED is or may be used.

The following individuals or entities are immune from civil liability for any personal injury that results from an act or omission that does not amount to willful or wanton misconduct or gross negligence, if applicable provisions of this part have been met by the individual or entity:

- a. A person providing medical oversight of the AED program, as designated in the plan;
- b. The entity responsible for the AED program, as designated in the plan;
- c. An individual providing training to others on the use of an AED.

Cyber Incident Response

A cyber incident is a violation or imminent threat of violation of computer security policies, acceptable use policies, or standard computer security practices. An incident response capability is necessary for rapidly detecting incidents, minimizing loss and destruction, mitigating the weaknesses that were exploited, and restoring computing services.

The School District is prepared to respond to cyber security incidents, to protect District systems and data, and prevent disruption of educational and related services by providing the required controls for incident handling, reporting, and monitoring, as well as incident response training, testing, and assistance.

Responsibilities of Specific Staff Members

Individual Information Technology User:

All users of District computing resources shall honor District policy and be aware of what constitutes a cyber security incident and shall understand incident reporting procedures.

District Information Technology Director

Provide incident response support resources that offer advice and assistance with handling and reporting of security incidents for users of School District information systems. Incident response support resources may include, but is not limited to: School District information technology staff, a response team outlined in this policy, and access to forensics services.

Establish a Cyber Security Incident Response Team (CSIRT) to ensure appropriate response to cyber security incidents. CSIRT responsibilities shall be defined in the School District position descriptions.

District Superintendent:

Develop organization and system-level cyber security incident response procedures to ensure management and key personnel are notified of cyber security incidents as required.

Procedures

Designated officials within the District shall review and approve incident response plans and procedures at least annually. The incident response plans and/or procedures shall:

- Provide the District with a roadmap for implementing its incident response capability
- Describe the structure and organization of the incident response capability

- Provide a high-level approach for how the incident response capability fits into the overall organization
- Meet the unique requirements of the District, which relate to mission, size, structure, and functions
- Define reportable incidents
- Provide metrics for measuring the incident response capability within the organization
- Define the resources and management support needed to effectively maintain and mature an incident response capability

Upon completion of the latest incident response plan, designated officials shall:

- Distribute copies of the incident response plan/procedures to incident response personnel.
- Communicate incident response plan/procedure changes to incident response personnel and other organizational elements as needed.
- Provide incident response training to information system users consistent with assigned roles and responsibilities before authorizing access to the information system or performing assigned duties, when required by information system changes; and annually thereafter.
- Test the incident response capability for the information systems they support at least annually to determine effectiveness.
- Track and document information system security incidents.
- Promptly report cyber security incident information to appropriate authorities in accordance with reporting procedures.
